ABOUT SERAX

Serax is a Belgian design brand, creating contemporary homeware in collaboration with leading international designers and makers. From dinnerware, accessories, lighting, pottery and furniture, the Serax collections are imagined by both established designers and new talent, each with their own distinctive vision and design signature.

Their creations are realised by skilled craftspeople from across the globe. While unique in design and materiality, the collections remain true to Serax's core philosophy of accessibility, quality and functionality.

Serax lighting unites sculptural forms with purposeful design. From pendant lights and floor lamps to table lamps and wall lights, each piece creates atmosphere through material, shape and light. Developed with international designers, these special lighting objects add depth and character to everyday interiors.

LIGHTING

Product overview

Alex Gabriels	LIGHTING

Alex Gabriels started her career as an art director in the advertising industry. During the past four years, she worked as a freelancer so that time could be freed up to develop her passion for ceramics. It's a passion she has been working on for years but has only become full time since 2020. "I acquired the love for tableware from my mother," she explains. "But I am happy to work with decorative ceramics such as lamps and vases of which several parts have to be turned separately. The assembly of those parts is always a magical moment".

Her passion for craftsmanship shines through in her Lighting collection of ceramic lamps and reflects her pure, elegant style and love for handmade ceramics.

Anita Le Grelle	TERRES DE REVES

Anita Le Grelle was born and raised in Antwerp, where she also gained her degree in graphic design. After working in advertising for a while, she moved to London with her family. While raising her kids there, she also attended sculpture classes at the Royal College of Art until achieving a diploma there too in 2000. For years, her works have been on display at numerous exhibitions in Belgium and London.

It was rather by coincidence that she ended up in the world of pottery in 2013. And how! In no-time, the demand for her creations became so great that she decided to continue along this path professionally: Terres De Rêves is both the name of her company and of her collection. The collection has evolved into a versatile range of lighting.

Ann Demeulemeester | LIGHTING

Ann Demeulemeester founded her eponymous fashion label with long-term creative partner Patrick Robyn in 1985 and quickly became a key figure in redefining the voice of fashion internationally. In 2014 she stepped down from her fashion label and has since been exploring a variety of new formats, including sculpture and ceramics.

Since 2019 Demeulemeester has been collaborating with Serax to produce a range of lighting and luminous objects.

Ann Demeulemeester is known to represent an intelligent approach to design – rising above trends and instead offering a continually evolving world that is both deeply personal and profoundly relevant to its context – thanks to its integrity and fierce independence. In essence, Demeulemeester's work continues to explore and celebrate contrasts – a beauty that is found in the interplay between strength and fragility, structure and nonchalance, poetic and radical, preciousness and functionality.

Antonio Sciortino | FOLD

Antonino Sciortino was born in Palermo. When he was just eight years old, he began to forge iron in his father's studio. He particularly worked with 'soft' iron, which is relatively pliable and thus easier to work with. For Serax, he has designed an exclusive collection for a broader market. Thanks to their artistic finishing touches, painted with brushes and polished, they retain the soul that Antonino aimed to give them.

Antonino Sciortino's new lighting pieces—a standing lamp and a table lamp—translate the essence of his metal artistry into light. Guided by the belief that simplicity is key, the design is reduced to pure, essential lines where form and function exist in quiet balance. Crafted in powder-coated stainless steel, the lamps reveal a sculptural lightness. Adjustable and thoughtfully minimal, each piece reflects Sciortino's artistic language: subtle, timeless, and defined by the beauty of simplicity.

Bea Mombaers	CILINDER LAMP

From sleek to eclectic interiors, from classic to contemporary styles – the refined proportions and timeless design of the large and small floor lamps by Bea Mombaers for Serax blend effortlessly into any space. The design is reimagined in linen, whose soft texture harmoniously complements every interior. The understated black lacquered steel frame and the large cylindrical linen shade create an unparalleled warm atmosphere. Bea Mombaers elevates minimalism to a new level of sophistication.

Bela Silva | LOOK AT ME

Although born and raised in Lisbon, we may well attribute the predicate ‘world citizen’ to the Portuguese artist Bela Silva. She studied in Portugal, the UK and the US and she explored all possible arts disciplines. Her work has shared the spotlight in exhibitions with that of Andy Warhol, and her tile art is popular from Brazil to Spain, across China and back to Portugal. Nowadays she commutes between Brussels and Lisbon, mainly focussing on her first love, ceramics.

For Serax, she created the Look at Me collection, bringing her expressive style to both pottery and lighting.

Bob Verhelst | NIZOU & YUCCA

The first part of the collection of objects and furniture, called “Sculptural Confluence | part 1,” designed by Bob Verhelst, fits perfectly within the universe of Serax, where functionality harmonises with aesthetics and art.

Verhelst is a versatile designer. Over the course of his career, he has built up an impressive track record, ranging from the design of theatre costumes to the scenography for various museums worldwide. He was a guest lecturer at the fashion academy in The Hague. He designed shop windows for brands like Hermès and Cartier and worked on the launch of ‘Flowerbomb’ at Viktor & Rolf, L’Oréal. He was also the art director at Graanmarkt 13. In addition, he has also found time to develop himself as a visual artist and designer.

The Sculptural Confluence | Part 1 collection by Bob Verhelst includes, alongside furniture, a number of artistic objects, including three different mood lamps in various versions. Verhelst, known as a scenographer and art director for many large international clients, is also a talented visual artist. His approach to creating art or design objects always starts in the same way: he makes sketches with pencil and paper, and then full-size prototypes are made from cardboard. This approach can be clearly seen in the ceramic feet of the lamps. In addition to the striking sculptural shape, for Verhelst, the colour and texture of the chosen glaze determine the design. Some glazes have a crackled effect, while others have a deep, rich colour. The lampshade, made of natural materials such as cord and linen, is placed on the base in different sizes. Regardless of which version is chosen, the lamps are guaranteed to be a distinctive addition to any interior.

Catherine Martin	FLAMBOYANCE & PALM

Catherine Martin is a celebrated art director with four Academy Awards to her name. She is renowned for the lavish sets of films such as Moulin Rouge!, The Great Gatsby and Elvis. She now channels that creative lushness into a collaboration with Serax.

The result is two ceramic collections named Palm and Flamboyance. Both feature jars, vases and lamps immersed in a tropical and oriental atmosphere inspired by the nineteenth and early twentieth centuries.

Palm's exuberant shapes are based on banana leaves, while Flamboyance celebrates the chinoiserie of 1920s Art Deco. With Palm and Flamboyance, Martin creates objects that instantly raise the temperature of any living room, hotel lobby or dining space.

Claire Horsten	ILLUMINA & LEO

Claire Horsten is a Belgian ceramic artist and interior architect who came to ceramics in 2019 and quickly built a distinctive practice around lighting. Her collection Leo, short for Light Emitting Object, is a series of rounded lamps, hand-thrown at the base and cast in moulds at the shade, in unglazed clay with natural earth tones. Her second collection, Illumina, takes a more architectural approach: slab-built cubes, rectangles, and ovals fitted with integrated LED lighting that casts a soft grid pattern onto the floor. Both collections are now presented by Serax. Together they form a coherent body of work: precise in form, honest in material, and considered in their relationship to the spaces they inhabit.

Coseincorso	PILLAR

COSEINCORSO is a multidisciplinary design studio founded by Marzia Cerio and Marwann Frikach. Their practice is mainly focused on challenging the boundaries between art and design. The two designers combine a contemporary and minimalist aesthetic with traditional craftsmanship, with the aim of infusing the production process with poetry again, like in traditional arts and crafts. All COSEINCORSO objects are made in collaboration with artisans who use locally sourced materials only. COSEINCORSO strives to convey an aspect of history, archaeology or geography in each of its collections, transposing the magic of specific cultures and customs into a series of poetic designs.

The Pillar Lamp, a table lamp inspired by the ruins of a column from classical antiquity. The design strikes a perfect balance between archaeology and modern design. The refined glaze of the ceramics creates a flickering light effect, similar to candlelight, contributing to an intimate atmosphere in the home.

Filip Arickx	OAK

Filip Arickx is a Belgian fashion designer who co-founded the label A.F. Vandevorst with An Vandevorst in 1997. The brand quickly became iconic for its distinctive style, blending elements of military uniforms, nurses' outfits, and fetish wear. Its highly recognizable stitched cross logo was inspired by the Red Cross emblem. After 23 years, the duo ended the label in 2020 with a farewell party in Paris, as the fashion world increasingly shifted from creativity to marketing.

Frédérick Gautier	FCK

After being an artistic director for over 20 years, handling the launch of various cultural projects, French designer Frédérick Gautier embarked on studies at the École du Paysage in Versailles, where he became acquainted with modelling and ceramics. Due to his fascination for brutalism, Gautier went in search of a type of clay that closely resembles concrete after the firing process. Since launching, his FCK signature has adorned all of his creations working with this material. Passionate about growing food, he is also doing research about tools that were once used to feed oneself with. With his enthusiasm for events, Frédérick Gautier also shares his work in a variety of spaces, turning exhibitions into performances.

“Although I am immensely interested in Brutalism, I am not charmed by really brutal objects. I am mainly looking for simplicity and functionality.” For Gautier, it is particularly important that the user is encouraged to be creative with the shape: to create figures, delineate spaces, serve tea, or to simply rest their feet. Following Frédérick Gautier’s striking statement with his widely praised FCK tableware, he now presents an extension of his work in concrete. Gautier is a late bloomer in the design world. Only after more than twenty years in the cultural sector did he trade his job for an unpredictable livelihood as a designer – although ‘designer’ might not really be the right word when it comes to Frédérick Gautier. Gautier is an artist, an artist in concrete. No design is noncommittal, behind every object there is carefully considered inspiration, a story, or a technique he has worked on for months. Gautier’s brutalist work leaves no one unmoved. You either love it or hate it.

Koen Van Guijze	SOFISTICATO

Koen Van Guijze's interest in lighting began while deejaying in his teens when he began to experiment with lights during performances, trying out different colours and intensities of light and syncopating them to the music. In 2002, he launched Accessori Architectural Lighting, one of Antwerp's leading lighting studios. Today, his designs are simple and precise, even raw, yet elevated by witty touches.

"I have been running my own lighting business for years, but there is still so much creativity in my head, just screaming for a way out. It has eagerly found its way into this lighting collection, Sofisticato. And that ... is just the beginning." He prefers 'authentic' materials such as steel, brass, concrete, cork, ceramics, sand and paper. His style is a mixture of brutalism and sophisticated details. Or as he himself says: "There is poetry in everything I design."

Kseniya Kravstova	HARNA

The Ukrainian artist and designer Kseniya Kravtsova has been living and working in the south of France for many years, where she finds inspiration in the slowness of life. Her work is an ode to the sudden, poetic moment and to small wonders. “Harna” means “beautiful” in Ukrainian. Her new lamp celebrates the beauty of flowers and of the earthly material clay. The form is inspired by her Ukrainian heritage and radiates a gentle softness, much like the character of the maker herself. With Harna, you bring a lamp into your home that refers to the origin of beauty: the primal material clay and the simple act of picking a flower.

Lauren Van Driessche	TERRA

As an interior architect, Lauren has always had an affinity with handmade objects. She discovered that clay was an ideal medium to give shape to her conceptual ideas and she decided to learn more about it. In her search for her 'own' style, Lauren Van Driessche experiments with different types of clay and techniques. According to Lauren, the contrast between the infinite number of possibilities and the characteristic limits turns the creative process into a fantastic voyage of discovery in which she can lose herself completely. Today, her work ranges from sculptural pieces to functional dishes with a distinctive design.

Marie Michielssen	LIGHTING

Marie Michielssen has been the in-house designer at Serax for more than two decades, launching two collections annually. During this period, she has carefully developed a range of objects designed for daily use, which unmistakably bear her signature. Her designs, which focus on functionality, are consistently characterised by an aesthetic aspect stemming from her graphic background and love of materials with character. Her portfolio includes a wide range of lamps, ranging from small mood lamps to imposing sculptural floor lamps. She alternates between ceramics and paper- maché, modelling both materials by hand, guided by her intuition. Sometimes, it results in geometric shapes inspired by constructivism and Bauhaus, and sometimes, organic, rounded forms that are inviting to the touch.

Patrick Paris | LIGHTING

Patrick Paris is completely self-educated as a designer, and according to him this is precisely one of the aspects that give his work such characteristic individuality. A second element is his passion for concrete, so heavy, yet still fragile, so cold, yet also very delicate, so unlikely ... Experimenting with the shades of colour and the effects of the material, Patrick creates surprising, enigmatic objects that do not always reveal their primary function at first glance. They are objects that challenge their original purpose with absurd ergonomics or with their surprising forms. Together with Serax, Patrick Paris aims to evince a bit of austerity for a world totally obsessed with comfort. And what better way to do this than with a wink and a nod?

Paul Stefan Gross	NOMAD

Paul Stefan Gross is a British designer with roots in Germany and France. He studied both sculpture and furniture design in London, a combination that has had a lasting impact on his career. Gross is known for his monochrome designs, deliberately avoiding frivolous colors and reducing design to its most essential, minimalist form. In 2013, he co-founded Homestories in Brooklyn, New York, a studio focused on humble, earthy, and tactile design. As a designer, Gross is a staunch advocate for the analog world. With over thirty years of experience in furniture and interior design for various companies, he is now stepping into the spotlight under his own name.

Sebastian Herkner	UALA

German designer Sebastian Herkner has won just about every prestigious design award in his career, a feat he largely owes to his keen eye for innovative material combinations and textures. For his collection for Serax, called Uala, Herkner went one step further, creating an elegant porcelain lamp with tropical allure.

Herkner always likes to start from the material in his creative process, examining its possibilities and limitations and investigating the user's experience of the material. For the Uala lamp, he chose to use porcelain, albeit in a different way. A fragile and rigid material, porcelain is not usually associated with the movement of pleats and folds. Herkner's organic, intensely pleated shape creates an interesting visual tension.

Seppe Van Heusden	SEAM

Dutch designer Seppe van Heusden intuitively creates objects that ascribe meaning to their space and context. Van Heusden graduated from Lund University School of Industrial Design (Sweden) in 2020, where he now works as a part-time lecturer. At the same time, he started as independent designer, with a focus on lighting, furniture and interior objects. In his work, van Heusden seeks to establish an architectural link with the aim of designing timeless objects. By working with contrasts, his designs acquire both subtlety and immediacy. Inspired by his experience with porcelain, he combines honest materials to create natural results. The start of the collaboration with Serax has set a strong tone, with more to come.

Sophie Ferjani | HERITAGE

French interior architect Sophie Ferjani graduated in spatial design from ENSAAMA Olivier de Serres and opened her own studio in 2005, where she and her team of architects shape interiors with the same guiding instinct: a balance of material, form and colour, built around what already exists. Her eye is unmistakably Mediterranean; drawn to materials with soul, forms with ease, and the kind of imperfection that feels more honest than perfection ever could. That instinct led her, in 2017, to open La Sélection, her concept store in Marseille, and later, in 2023, to launch her own brand with textiles, enamelware and candles, each one an ode to the city she calls home. For Serax, she designed Heritage, a lighting collection that carries the warmth and texture of the Mediterranean into every room it touches.

Heritage by Sophie Ferjani for Serax is a lighting collection rooted in memory, material, and the beauty of things made to last. Combining chamotte clay with raw wool, the lamps bring together strength and softness: textured stoneware bases inspired by Provençal pottery and unspun wool shades that gently diffuse the light. Shaped by Ferjani's mediterranean way of life and her belief that beauty is something we pass on, Heritage honours the hand, the raw material, and the quiet presence of objects with a story.

Studio Ottawa	NEBULA

Zurich-based Studio Ottawa was founded by Nadine Ottawa, who first earned her stripes in the hospitality industry. Her warm, understated and very contemporary aesthetic strikes just the right balance between traditional crafts and a contemporary design language. In recent years, the designer started experimenting with handmade ceramics. The style of her earthenware designs is in the same vein as her hospitality projects, making her collections very popular with hotels and restaurants. Studio Ottawa is synonymous with design that blends contemporary minimalism with the cosy ambience of yesteryear.

Studio Simple | LIGHTING

For years, design duo Ann Vereecken and Jeroen Worst have been creating interior concepts for a multitude of clients. And for almost every concept, they crafted complementary objects by hand to give them their very own personal touch. When some of these objects found their way to Serax in 2013, the wheels were set in motion. Under the name Studio Simple - a name that perfectly reflects the duo's philosophy of creating simple, yet strong, everyday objects that are both logical and beautiful in a timeless way - they have brought to life an ever growing accessory and lighting collection. Never losing track of the main ingredient, 'simplicity', and using mostly local resources, Ann works her magic on the aesthetics, while Jeroen mainly focusses on the practical and technical aspects. Together, and with a smooth natural flow, they make simplicity and minimalism liveable, warm and cosy.

Sylvain Willenz	TRONCO

After Sylvain Willenz graduated from the Royal College of Art in London in 2003, he started his own design studio in Brussels. Since then he has designed mainly furniture, lighting, and objects for international labels such as Hem, Durlet, and Established & Sons. In 2009, Willenz was named Designer of the Year by Stichting Interieur and Weekend Knack. At some point in his life, Willenz wanted to become a cartoonist. This predilection for graphics can still be found in his designs today, in combination with a detailed search for simplicity and elegance.

Together with Serax, he has created Tronco Lighting, possibly his quirkiest work to date, with a table lamp shaped like a tree trunk with a luminous canopy.

Thijs Prrinsen	PRIMARY SHAPE

Thijs Prinsen, architect manager (°1984), received his architect diploma from the Provinciale Hogeschool Limburg in 2007. He followed the specialisation of visual arts and graduated with a project for a museum aimed at the sensitive experience of the visitor, framed within a master plan execution of the “Tapijnkazerne” in Maastricht and a phenomenological landscape research between Maaseik and Kessenich. After his studies, he was selected to participate in the “Master’s Trial” under the supervision of the Flemish Construction Master Marcel Smets. Since 2007, he has worked as an independent architect at Lens°ass Architects, where he became a partner in 2012 and currently leads the agency.

THIJS PRINSEN - PRIMARY SHAPE

Concrete wall lamps

FITTING MATERIAL	E14
QUANTITY OF LAMPS	1
LAMP	NOT INCLUDED
SWITCH	NO
DIMMABLE	NO
MAX WATT	5 WATT
MAX VOLT	240 VOLT
CERTIFICATION	CLASS I
ENVIRONMENT	INDOOR

WALL LAMP
PRIMARY SHAPE °1
CONCRETE
B7224001-813
L15 W15 H16 CM
L5,91 W5,91 H6,3 INCH

WALL LAMP
PRIMARY SHAPE °1
