SAVJETI ZA ČIŠĆENJE

Za čišćenje Alveus kuhinjskih slavina najbolje je koristiti mekanu krpu, vruću vodu i tekući deterdžent za kuhinjske sudopere. Ako dođe do nakupljanja kamenca na slavini, uklonite ga 9% octenom kiselinom. Sredstva za čišćenje srebra, čelične vune, izbjeljivači ili abrazivni deterdženti mogu oštetiti završnu obradu slavine, pa ih treba izbjegavati. Deterdženti na bazi klora (soda hipoklorit) ili hidrokloridna kiselina mogu imati isti učinak.
