

# IGP-HWF*superior* 57 Lasting Experience Collection

---

Super durable, premium-grade façade coatings:  
scratch-resistant powder coatings combined with  
highly weather-resistant brilliance.

A dense, close-up photograph of various tropical leaves, including large, deeply lobed monstera leaves and smoother, elongated leaves, creating a rich green and dark green texture.

For maximum  
color and gloss  
stability.

swiss  quality

**Unrivaled in its class.**

**Super durable PLUS**

IGP-HWF*superior* 57 withstands a five-year testing period under intense UV exposure in the hot, humid Florida climate, achieving proven top-level color and gloss stability.

It meets the extremely demanding requirements of quality standards such as GSB Florida 5, QUALICOAT Class 2, and AAMA 2604.

### Your benefits at a glance

- + Process safety through compliance with global quality standards
- + Value preservation thanks to significantly enhanced color and film integrity
- + Long-term product warranties
- + Easy-to-clean surfaces thanks to the IGP-DURA<sup>®</sup>clean effect
- + Environmentally friendly thanks to PFAS-free binders
- + Economical with 1-layer application
- + High opacity even on inhomogeneous substrates

# Value preservation and efficiency.

## IGP-Effectives® technology – process safety and material efficiency

Effect shades produced with the patented IGP-Effectives® technology are characterized by a uniform and consistent effect distribution. This enhances color consistency, even if different application parameters are used or several coating companies work on the same project.

IGP-Effectives® technology ensures high recovery rates of overspray during closed-loop application. Even after multiple cycles, up to 97% of the fresh powder can be recovered, resulting in high material efficiency.

## Robust surfaces

Enhanced scratch resistance provides significant added value for both manufacturers and users. It effectively protects the coated surfaces against chipping and abrasive stress, improving durability during assembly work and maintenance cleaning.

## Green building credits

IGP-HWF*superior* 57 powder coatings are based on PFAS-free binder systems and are ideal for Green Building projects. Energy-efficient curing of the varnish at temperatures from 170°C, as well as the absence of solvents (VOC) and the use of formaldehyde-free formulas, make these powder coatings an environmentally friendly option for sustainable building designs.

## The best of both worlds

The IGP-HWF*superior* 57 coating series is certified in accordance with the quality standards for aluminum defined by the GSB and QUALICOAT certification bodies. It also meets the requirements of Qualisteelcoat for coating steel and galvanized steel. Furthermore, this product series has been tested and independently validated in accordance with the American Architectural Manufacturers Association (AAMA) guidelines for super durable façade coatings.

**70% higher gloss and color stability than conventional super durable façade coatings.**

## IGP-HWF*superior* 57 product range

Product group	Surface aspects		Approvals / test reports
5703A-S1 5703E-S3 5703U-S1	Solid color Effect shades IGP-Effectives® technology	Smooth finish, matte	<b>On aluminum:</b> QUALICOAT Class 2, GSB Florida 5, and AAMA 2604  <b>On steel and galvanized steel:</b> Qualisteelcoat ST2/HD2, tested on IGP-KORROPRIMER 60  <b>Fire behavior:</b> Test report in accordance with DIN EN 13501-1
