## BIG - Bjarke Ingels Group

BIG is a Copenhagen, New York, London and Barcelona based group of architects, designers, urbanists, landscape professionals, interior and product designers, researchers and inventors. The office is currently involved in a large number of projects throughout Europe, North America, Asia and Middle East.

BIG's architecture emerges out of a careful analysis of how contemporary life constantly evolves and changes. Not least due to the influence from multicultural exchange, global economical flows and communication technologies, that all together require new ways of architectural and urban organization. They believe that in order to deal with today's challenges, architecture can profitably move into a field that has been largely unexplored. A pragmatic utopian architecture that steers clear of the petrifying pragmatism of boring boxes and the naïve utopian ideas of digital formalism. Like a form of programmatic alchemy, they create architecture by mixing conventional ingredients such as living, leisure, working, parking and shopping. By hitting the fertile overlap between pragmatic and utopia, the architects once again find the freedom to change the surface of our planet, to better fit contemporary life forms.

# Alphabet of light

BIG - Bjarke Ingels Group  
2016

Alphabet of light system is a lighting language that continues to grow with new elements so it can be developed with increasing freedom throughout space. It is a basic principle that generates an open system implementing just a handful of basic modules.

Thanks to specific geometric proportions, these modules can be combined together to form endless lighting structures, from the most elemental to the most complex, both linear and curved. The BIG idea is combined with Artemide's optoelectronic expertise to give rise to an innovative construction principle that casts continuous and comfortable light.

It is a minimal presence that conceals ultra-sophisticated optoelectronic and patented mechanical innovation as well as ground-breaking control. The system can be controlled using the Artemide App to create freedom both in geometric design and in the definition of dynamic performance levels, which can be programmed or modified in real time. BIG designed also a new font, an alphabet that can be used to write and express one's thoughts, to establish an identity and to guide visitors through a space using light. Alphabet of Light collection can help give shape to a wide range of locations and public spaces, from hospitality and offices to educational and retail, as well as being perfect for private residential application.

# Alphabet of light system configuration

Materials: structure in anodized natural aluminum, tube in white diffusing PMMA.

Linear module are available in three lengths: L 600 / 1200 / 1800 mm

Possibility to articulate the configuration on the horizontal plane with 60°, 45° and 22,5° curves, T and X joint and on the vertical plane.

Max 10 m for each power unit (10 m in one direction or X+Y=10 m in both directions).

Dali / 1-10 / Push or APP dimmable power units, recessed or ceiling mounted.

All modules powered by same power unit will share the same dimming level.

# Alphabet of light configurator

Artemide provides tools to support the end customer and especially the lighting professionals in choosing the best lighting solution.

For an intuitive composition of the most complex systems, Artemide offers innovative and complete configurators on its website.

Alphabet of light system Configurator is a useful tool to simplify the design of your composition.

After defining the layout of the space, the desired system can be created by a simple drag and drop of the various available modules. Once the project is completed, the system returns drawings and a complete datasheet with all the details to proceed with the order.

## 1. Build your space

## 2. Drag and drop

## 3. Save it and send it!

# Gople system

BIG - Bjarke Ingles Group  
2020

Gople system combines with the Alphabet of light system, creating a universal lighting able to meet the requirements of any space, but above all to define a new approach to lighting projects.

This is an increasingly universal language that diversifies its performance and expands the freedom to illuminate every angle.

Gople spot adds accent lights to break up the diffused light of Alphabet of light. Light thus follows spaces and activities not just by tracing geometries that move fluidly in three directions, but also through an alternation of light and shadow, the choice of light emissions that are diversified and specialised.

Alphabet of light is a versatile, multi-use project, perfect for illuminating any space, which in combination with Gople system opens up new fields of application and increasingly becomes the ideal tool for retail spaces.

Gople spot offers efficient performance, excellent colour rendering and numerous variables in terms of emission qualities such as colour temperature and beam angles, which make it a professional, technical product.

ARTEMIDE  
APP

# Complete system

Gople system is designed to allow double emission: it can have a track for direct spot emission and a diffused indirect light.

The different typology of Gople system modules can be combined with the maximum freedom.

The same diameter of Alphabet of light and Gople system allows to combine the two systems with mechanical continuity.

## Professional performance

Gople spot offers highly professional performance within the soft geometries that remind in reduced-scale the iconic Gople diffuser. The spotlight comes in two sizes, corresponding to different power and flux levels, each with multiple beam angles.

Artemide's expertise in managing the different qualities of light is also expressed in the ability to personalise light emissions with custom solutions, selecting the parameters of colour rendering (Gamut index and Fidelity Index) and spectrum quality dedicated to specific display situations.

## Endless Possibilities

Gople system modules can be combined in line or allow the freedom to define any corner in the space with an electrical connection unconstrained by any mechanical joint.

Thanks to Artemide's experience in developing systems that are increasingly unhindered by the limitations of electrical connections, Gople track can extend for long sections with just a single point of electrical connection.

On Gople system each spot can be managed separately with Artemide App to define flexible and dynamic scenarios.

# Alphabet of light Letters & Letters Mini

os over the lazy dog

*'There is nothing more beautiful than we do  
out of their way to make the world a better place'  
Henry David Thoreau*

## MDF SUPPORT INSTALLATION

The letters are provided mounted on MDF panels to allow installation on any kind of wall. Installation requires creating a counter-frame to accommodate the drivers, supplied separately, and the power cables.

1. Create the supporting frame and provide for power connections for the individual letters.

2. Connect panel **b** to power source.

3. Fix panel **i** and connect panel **b** to power source.

4. Fix panel **i** and connect panel **g** to power source.

5. Fix panel **g** and close using the supplied panels.

6. Complete closing using the supplied panels.

7. Frame ready for finishing.

8. Apply the gauze and plaster flush with the gaps between panels.

9. Final painting.

## CARDBOARD MOUNTING-SUPPORT INSTALLATION

The letters are provided with a packaging that ensures the right support during the installation process. This type of installation is suitable for existing drywalls that have accessible back space for the housing of drivers (code DV1009) supplied separately and cables (power supply 75 W max - 2 letters or more up to max 85% load).

1. Drywall with accessible back space. Use the provided template to drill the holes and paint the drywall.

2. Install wall pins, identify output points and prepare wiring connections.

3. Connection of letter **b** to first wall output.

4. Attachment of letter **b** on wall pins.

5. Detail of the wall pins fixing.

6. Detail of the wall pins fixing.

7. Removal of the nylon wrapper.

8. Removal of the cardboard support.

9. Repeat the procedure for the other letters. Finished.

# Alphabet of light and Gople system are compatible with **Artemide App**

Artemide App is a user-friendly and intuitive interface used to control individual products, groups of appliances and lighting scenarios. It is a tool that can be associated with several products from both the Design and the Architectural Catalogues.
